CHEAT CODE

QoS cheat sheet

- Voice RTP is commonly EF, DSCP 46. Confirm the service parameter.
- Cisco designs often mark signaling CS3. RFC 4594 assigns signaling to CS5.
- A mark without a priority queue is a label.
- G.711 at 20 ms is 80 kbit/s at layer 3 and 87.2 kbit/s with an 18-byte Ethernet header.
- G.114 planning talk is about one-way delay around 150 ms.

Sources: RFC 4594 and the CUCM QoS service parameters for the release you run.
