Call recording note

Phone-based recording forks from the phone. Network-based recording can fork from the phone or the gateway.
SIPREC is a separate recording session. RFC 7866 is the protocol. RFC 7865 is the metadata.
CUBE's IOS XE 17.6 guide calls CUBE the session recording client when SIPREC is configured.
A quality score is not the audio file.
Consent and retention were not opened. Confirm the rule where you operate.

Independent free learning-only student project. Trademarks belong to their owners. Not affiliated or endorsed. Contact: https://cyphermonkeylabs.com/#contact. Nothing is sold.
